EDUCATION

Saint Martin's University

Dean's List 2019 – 2024

M.S. Computer Science (May 2024) | B.S. Computer Science (May 2023)

Lacey, WA

Coursework: Data Structures & Algorithms, Database Management, AI, Cloud Computing, Cryptography

SKILLS

Languages: JavaScript, TypeScript, Python, C#, SQL, Java, HTML/CSS

Frameworks & Libraries: React, Next.js, FastAPI, Node.js, Express.js, ASP.NET Core, Prisma, EF Core, Unity 3D

AI & Cloud: Claude AI, OpenAI API, LangGraph, RAG, ChromaDB, AWS (ECS/S3/DynamoDB), Docker, Terraform

Tools: MongoDB, MySQL, SQLite, Git/GitHub, GitHub Actions, CI/CD, JWT Auth, REST APIs, Agile, VS Code, Visual Studio

EXPERIENCE

Patient Care Coordinator, 425 Dental

2024 – Pres.

- Engineered custom KPI analytics frameworks and automated reporting pipelines for executive leadership, parsing operational metrics to resolve scheduling gaps.
- Optimized internal patient recall database structures and workflows; gathered core system constraints that directly informed product requirements for DentaVision.

Graduate Assistant / TA, Saint Martin's University

2023 – 2024

- Conducted technical code reviews, pair-programming modules, and structured 1:1 debugging sessions for 8+ computing students per semester, enforcing efficient object-oriented design patterns.
- Designed strict project rubrics to provide objective evaluations on student implementations of complex data structures, graph search algorithms, and relational SQL queries.

Sales Service Expert, 24HR Fitness – Issaquah

2022 – 2023

- Exceeded monthly business enrollment targets through consultative selling; successfully managed cross-functional workflows and onboarded new members into corporate accounting setups.

PROJECTS

DentaVision | React, Node.js, Express, MongoDB, Claude AI

denta-vision.vercel.app

- Shipped a live dental SaaS (Vercel + Render) with dual-role JWT auth, clinic dashboards, NPI validation, Stripe billing, and a GitHub Actions CI/CD pipeline — 20 Jest tests gate every production deploy.
- Engineered an automated Claude Vision workflow parsing clinical images into dynamic CDT insurance codes, tooth surfaces, and prioritized visit sequences rendered beautifully over an interactive SVG layout.

AgentForge | Next.js 14, TypeScript, Prisma, OpenAI, Anthropic

- Designed a high-throughput multi-LLM comparison platform using type-safe Next.js 14 App Router to enable side-by-side performance benchmarking and prompt fine-tuning.
- Implemented parallel execution architectures leveraging real-time Server-Sent Events (SSE) streaming layers to deliver incoming output text chunks from GPT-4 and Claude concurrently.

MedInsight API | Python, FastAPI, LangGraph, AWS ECS, Docker, Terraform

- Provisioned containerized FastAPI web services on AWS ECS Fargate with infrastructure-as-code automation using Terraform, AWS ECR deployment setups, S3 asset buckets, and DynamoDB data states.
- Built a LangGraph multi-agent pipeline with RAG retrieval, AES-256 encryption, and HIPAA-compliant audit logging; 40 pytest tests cover auth, encryption, and audit trail end-to-end.

DocuChat | Python, FastAPI, ChromaDB, Sentence Transformers, Claude AI

- Built a robust RAG backend pipeline executing automated PDF/TXT parsing, sliding-window chunking, and MiniLM text vector space embedding configurations.
- Developed vector semantic searches inside a persistent ChromaDB database layout to deliver prompt, source-attributed Q&A with clear text citations generated via Anthropic Claude integrations.

Echoed Nights | Unity, C#, NavMesh AI

Published on Steam

- Owned the end-to-end commercial lifecycle, asset compiling, and deployment distribution parameters for a published desktop game title actively distributed on the Steam Store global marketplace.
