EDUCATION

Saint Martin's University

Dean's List 2019 – 2024

M.S. Computer Science (May 2024) | B.S. Computer Science (May 2023)

Lacey, WA

Coursework: Data Structures & Algorithms, Database Management, AI, Cloud Computing, Cryptography

SKILLS

Languages: JavaScript, TypeScript, Python, C#, SQL, Java, HTML/CSS

Frameworks & Libraries: React, Next.js, FastAPI, Node.js, Express.js, ASP.NET Core, Prisma, EF Core, Unity 3D

AI & Cloud: Claude AI, OpenAI API, LangGraph, RAG, ChromaDB, AWS (ECS/S3/DynamoDB), Docker, Terraform

Tools: MongoDB, MySQL, SQLite, Git/GitHub, JWT Auth, REST APIs, Agile, VS Code, Visual Studio

EXPERIENCE

Patient Care Coordinator, 425 Dental

2024 – Pres.

- Generated monthly KPI reports for executive leadership; identified scheduling inefficiencies that improved provider utilization across a 10+ provider practice.
- Managed patient recall workflows and front-end data systems; clinical experience directly shaped DentaVision's feature set and product requirements.

Graduate Assistant / TA, Saint Martin's University

2023 – 2024

- Conducted code reviews and 1:1 debugging sessions for 8+ students per semester across data structures, algorithms, and software engineering coursework.
- Designed project rubrics and delivered structured evaluations on student implementations of data structures, graph algorithms, and relational SQL queries.

Sales Service Expert, 24HR Fitness – Issaquah

2022 – 2023

- Exceeded monthly enrollment targets through consultative selling; onboarded new members and maintained long-term client retention relationships.

PROJECTS

DentaVision | React, Node.js, Express, MongoDB, Claude AI

denta-vision.vercel.app

- Shipped a live dental SaaS platform (Vercel + Render) featuring secure dual-role JWT authentication, clinic admin dashboards, real-time NPI validation, Stripe billing, and a progressive PWA.
- Engineered a Claude Vision workflow parsing clinical images into CDT codes, tooth surfaces, and prioritized visit sequences displayed on an interactive SVG tooth chart with AI chat.
- Built from direct experience as a Patient Care Coordinator — translated real clinical workflows into production software, concept to launch in weeks.

AgentForge | Next.js 14, TypeScript, Prisma, OpenAI, Anthropic

- Built a multi-LLM comparison platform using type-safe Next.js 14 App Router enabling side-by-side prompt evaluation and latency benchmarking across GPT-4 and Claude.
- Implemented real-time SSE streaming for concurrent token delivery from multiple models; Prisma-backed conversation history with persistent session management.

MedInsight API | Python, FastAPI, LangGraph, AWS ECS, Docker, Terraform

- Provisioned containerized FastAPI web services on AWS ECS Fargate with infrastructure-as-code automation using Terraform, AWS ECR deployment setups, S3 asset buckets, and DynamoDB data states.
- Built a LangGraph multi-agent orchestration pipeline executing specialized RAG context retrieval, dynamic state-machine steps, AES-256 parameter encryption, and strict HIPAA-compliant audit logging.

Echoed Nights | Unity, C#, NavMesh AI

Published on Steam

- Shipped a first-person horror game on Steam with NavMesh pathfinding FSM enemy AI, dynamic difficulty scaling, and full end-to-end ownership from design through QA and release.
